## FLEETWOOD

### Aluminum Finishes

#### Replicated Wood Finishes

In addition to our anodized and painted finishes we are offering nine different finishes that emulate wood. As you can see, the product looks like actual wood but offers all the advantages of aluminum.

#### Process

The Aluminum extrusions are cleaned and then treated with a chemical conversion solution which allows the paint primer to properly adhere. After the appropriate primer color is applied the proprietary process of creating the wood grain is performed. The net result is a life like presentation of wood.

#### Care & Maintenance

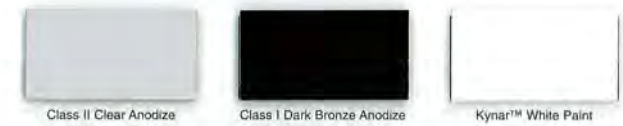

Fleetwood offers a comprehensive manual for the proper maintenance of every Fleetwood window and door product. Based on decades of experience and scientific evidence, aluminum should retain its factory finish for life, if properly maintained. This process has successfully exceeded the requirements of AAMA 2604-02.

## FLEETWOOD

### Aluminum Finishes

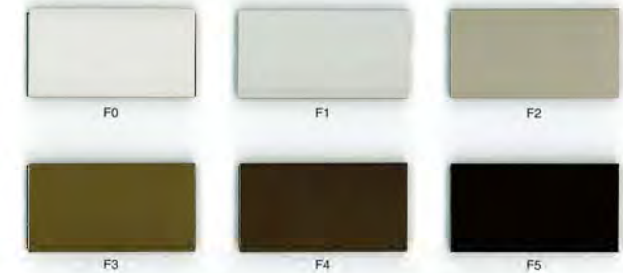

#### Fast Track Finishes

Fleetwood offers its aluminum products in thousands of colors but offers three finishes with a faster production time. Those finishes are shown below:

#### Custom Color Anodizing

We offer six additional earth tone colors as shown below. On the back page you can read more about the exceptional benefits of anodized finishes.

Anodizing reveals the real, natural beauty and imperfections of aluminum. Also expect shade variations as much as 50% of one shade lighter and/or darker. Additional information online at [www.FleetwoodUSA.com](http://www.FleetwoodUSA.com)

#### Custom Color Paints

We offer hundreds of additional paint colors. We invite you to review our "Favorite 21 Colors" sheet or bring us your paint chip or UC number and we will do our best to match the color exactly.
